

ELUXEO™ VIDEO GASTROSCOPE EG-760Z Optical Magnification

This zoom gastroscop features the well-known 135 x Multi Zoom which leads to clear and more detailed visualisation, allowing deeper analysis of mucosal structures. It has a small bending radius and similar functionality to the routine gastroscop including all features.

SMALL BENDING RADIUS

The EG-760Z features a tight bending section radius with improved angulation. This allows the endoscope to approach the targeted observation point and lesion more easily and with less effort.
