

## EVIS LUCERA E L I T E

EVIS LUCERA ELITE XENON LIGHT SOURCE

**CLV-290SL** 

One-touch access to HDTV and NBI

## **OLYMPUS CLV-290SL**

## **Main Features**

- NBI (Narrow Band Imaging) in EVIS LUCERA ELITE provides twice the viewable distance of EVIS LUCERA SPECTRUM, while advanced noise reduction works more effectively and image response speed from dark to bright is much faster.
- The newly designed waterproof one-touch connector allows a one-step connection to the light source and does not require a scope cable.
- Considerable reduction in operating noise thanks to redesigned fan.
- Link connection to peripheral devices avoids complicated cable connections and accelerates transmission speed.

 Improved AFI (Auto Fluorescence Imaging) produces less color splitting by quicker image tracking than previous models. With its high image quality and minimized noise, it enables accurate observation of mucosal conditions.

## **Specifications**

| Power Supply  | Voltage   | 100–240 V AC; within ±10%  |
|---|---|--|
|   | Frequency   | 50/60 Hz; within ±1 Hz   |
|   | Consumption electric power                                  | 600 VA   |
| Size  | Dimensions (W x H x D)                                      | 370 x 150 x 476 mm (standard)<br>390 x 162 x 551 mm (maximum)  |
|   | Weight  | 18 kg  |
| Illumination  | Examination lamp  | Xenon short-arc lamp (ozone-free) 300 W  |
|   | Average lamp life   | Approximately 500 hours of continuous use (With intermittent use, the lamp life may vary slightly.)              |
|   | Ignition method   | Switching regulator  |
|   | Brightness adjustment                                       | Light-path diaphragm control   |
|   | Cooling   | Forced-air cooling   |
|   | NBI observation   | Available  |
|   | AFI observation   | Available  |
|   | IRI observation   | Available  |
|   | Emergency lamp  | Halogen lamp (within mirror) 12 V 35 W   |
|   | Average emergency lamp life                                 | Approximately 500 hours  |
| Automatic Brightness<br>Adjustment                  | Automatic brightness adjustment method                      | Servo-diaphragm method   |
|   | Automatic exposure  | 17 steps   |
| Air Feeding   | Pump  | Diaphragm type pump  |
|   | Pressure switching  | 4-level available (OFF, low, medium, high)   |
| Water Feeding                                       | Method  | Feeds water by pressurizing the detachable water container with air.   |
| Indicators on Front<br>Panel                        | Emergency lamp  | Indicates absence of emergency lamp, disconnection and use of emergency lamp.                                    |
|   | NBI   | When the NBI observation is enabled, the NBI indicator lights up.  |
|   | AFI   | When the AFI observation is enabled, the AFI indicator lights up.  |
|   | IRI   | When the IRI observation is enabled, the IRI indicator lights up.  |
| Setting Memory                                      |   | Settings (except filter setting) are stored even when the light source is OFF.                                   |
| Classification<br>(medical electrical<br>equipment) | Type of protection against electric shock                   | Class I  |
|   | Degree of protection against electric shock of applied part | TYPE BF applied part  NOTE: The applied part as classification types are not marked is the TYPE BF applied part. |
|   | Degree of protection against explosion                      | This instrument should be kept away from flammable gases.  |
|   |   |  |
