

LigaSure™ XP Maryland jaw devices

# Take vessel sealing to the next level.

Offering one-step or latching handle designs, LigaSure™ XP Maryland jaw devices provide surgeons new levels of performance,<sup>1,†,‡,§</sup> precision,<sup>1,†,‡</sup> and procedural efficiency<sup>1,‡,Ω</sup> in vessel sealing.

## Performance

- Confidence to reliably seal thick tissue<sup>2,3,§,††</sup>
- Longer seal plate length and optimal jaw force for grasping, manipulating, and sealing thick tissue<sup>3,4,§,‡‡</sup>

## Precision

- Jaw design makes it easier to access tissue planes<sup>2,§§,ΩΩ</sup>
- Curved jaws enable fine dissection and skeletonization of vessels<sup>2,††</sup>

†Compared to their current preferred device; 21 of 23 surgeons agreed during clinical procedures. ‡The LigaSure™ XP Maryland jaw device is indicated for use in general surgery and such surgical specialties as colorectal, bariatric, urologic, vascular, thoracic, and gynecologic. §Thick tissue is defined as nondissected vascular tissue or fatty tissue. ΩCompared to their current preferred device; 20 of 23 surgeons agreed during clinical procedures. ††29 out of 29 surgeons agree. ‡‡Bench tissue may not be indicative of clinical tissue performance but is a controllable substitute acceptable to regulatory bodies. §§24 out of 29 surgeons agree. ΩΩCompared to legacy LigaSure™ devices. †††28 out of 29 surgeons agree.

## Procedural efficiency

- Longer jaws seal and transect more tissue per bite<sup>2,ΩΩ,†††</sup>
- 360-degree continuous jaw rotation improves efficiency with uninterrupted movement<sup>2,††,ΩΩ</sup>

## True to legacy LigaSure™ device performance

- Equivalent jaw and shaft temperatures after multiple activations<sup>5</sup>
- Same LigaSure™ technology standard of less than 2 mm mean lateral thermal spread<sup>6,7</sup>

Legacy LigaSure™

LigaSure™ XP

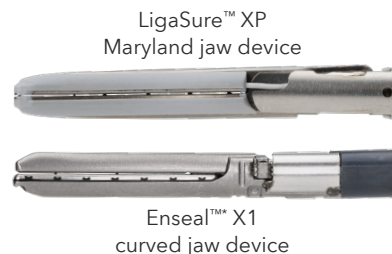

# Performance advantages give you the edge.

The LigaSure™ XP Maryland jaw device does more than take our trusted vessel sealing technology to the next level. It also outshines the Ethicon Enseal™ X1 curved jaw device in areas of performance critical to your OR – and your patients.

## LigaSure™ XP Maryland jaw device vs. Ethicon Enseal™ X1 curved jaw device

- **32% increase** in average burst pressure on large vessels<sup>8,†,‡</sup>
- **2.9 times higher** average burst pressure on thick tissue<sup>3,‡,§</sup>
- **38% faster** activation time in acute tissue<sup>6</sup>
- **13% reduction** in tissue sticking<sup>9,‡</sup>

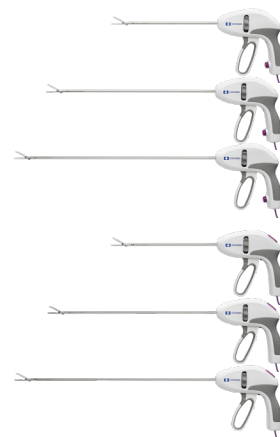

See the LigaSure™ XP difference

## Ordering information

Two handle designs. Three device lengths.

<b>LXMJ23S</b>	Open Sealer/Divider, One-step Sealing, Nano-coated, 5 mm – 23 cm	6 per case
<b>LXMJ37S</b>	Laparoscopic Sealer/Divider, One-step Sealing, Nano-coated, 5 mm – 37 cm	6 per case
<b>LXMJ44S</b>	Laparoscopic Sealer/Divider, One-step Sealing, Nano-coated, 5 mm – 44 cm	6 per case
<b>LXMJ23L</b>	Open Sealer/Divider, Latching Handle, Nano-coated, 5 mm – 23 cm	6 per case
<b>LXMJ37L</b>	Laparoscopic Sealer/Divider, Latching Handle, Nano-coated, 5 mm – 37 cm	6 per case
<b>LXMJ44L</b>	Laparoscopic Sealer/Divider, Latching Handle, Nano-coated, 5 mm – 44 cm	6 per case

**It's time for an upgrade. Bring the LigaSure™ XP Maryland jaw device to your OR.**

Call your Medtronic sales rep today.

†Large vessels are defined as 5.1-7.0 mm. ‡Bench tissue may not be indicative of clinical tissue performance but is a controllable substitute acceptable to regulatory bodies. §Thick tissue is defined as nondissected vascular tissue or fatty tissue.
